HOA Provides Commercial Resin Pool Furniture and Patio Umbrellas — Residents Rejoice!

August 21, 2015

Contract Furniture Company

Contract Furniture Company recently had the pleasure of working with Stone Canyon Apartments in Mesa, AZ, to revamp their resin pool furniture and add some patio umbrellas.

With summer temperatures soaring well above 100 degrees, folks at the Stone Canyon Apartments count on being able to cool off in their community pool throughout the day. Recent additions to the pool and patio area have made it an even more desirable place to hang out, like the market umbrellas that Contract Furniture Company furnished. In gorgeous shades of tangerine and Pacific blue, these [patio umbrellas](#) provide shade as well as sun protection.

Aluminum Patio Market Umbrella

Adding to the overall enjoyment of the poolside lounge area are the [Air XL resin chairs](#) that were purchased. With a deep, comfortable seat and marine grade resin, these chairs are designed to provide many years of service and satisfying sitting. Residents can rest in these pool chairs for hours and it makes no difference if someone is wet from the pool or wearing dry clothing, the Air XL can handle anything with ease.

Air XL Resin Armchair

Wanting to incorporate rich, warm tones into their tropical decor, the management at Stone Canyon chose [Madrid cast aluminum dining tables](#) as the centerpiece of their seating clusters. The Madrid is a lightweight table constructed of rust-resistant aluminum, and features a chocolate brown metal finish. The fact that table comes standard with an umbrella hole made all the difference when it came time to make a purchasing decision — the apartment complex didn't need to purchase additional bases for their umbrellas, which cut down on their costs. That the table was in stock for immediate shipment was just icing on the cake.

Omega Resin Chaise Lounge

Whether worshipping the sun or drying off after a dip, residents can now do it in comfort and style thanks to the [Omega resin chaise lounges](#) that were purchased for their enjoyment. Durability and longevity were two key factors for the management at Stone Canyon Apartments, which is why they chose the Omega chaises. Constructed of commercial grade resin and stain-resistant sling fabric, these Italian-made chaise loungers will easily withstand the harsh conditions of an Arizona summer. Plus, they have the added benefit of being stackable, meaning they can be easily stored when not in use.
