

When Silhouette Design Architecture in Chicago contacted us, they provided us with a rendering of an upcoming project at Los Angeles Airport for SeaLegs Wine Bar. With the help of our team, we were able to bring their imagination to life by finding products that suited their design, time frame and budget. At Contract Furniture Company, not only do we supply goods, we assist in project management to make our client's concept a reality!

The Camelia features a swivel seat, upholstered seat and back, and a steel frame. This stool is made to order with your choice of powdercoating and upholstery.

The Mani chair features a molded wood back, chrome legs and upholstered seat. Its midcentury style gives it a timeless look with your choice of upholstery and stain.
